

# PHD STUDENT PARTY PROGRAM

Department of Linguistics, Stockholm University

*April 15th, 2016 (you can still breath the air on Earth)*

Time	Person presenting	Title	Twitter-length abstract
14.30	Josefina Safar	Lexical variation in Yucatec Maya Sign Languages: Methodological and ethical issues	#VariationInYMSL: Doing fieldwork in Yucatec Maya signing communities is not a straightforward task. This is how I did it.
14.40	Johan Sjons	Information density in speech	Administration weight on teachers yields rare rabies. Oops, typos. I meant: Articulation rate in speakers talking to their babies. #lingfest16
14.50	Signe Tonér	Effects of preschool intervention on language skills, attention and executive function	#hjarnvagariforskolan will put pedagogical interventions in Swedish preschools to the test. Bonus: lots of interesting data!
15.00	PLEASE HAVE	FIKA FOR	20 MINUTES
15.20	Natalia Perkova	What can language contacts bring along?	Ever wondered how one speaks about 'taking along' in the Baltic Sea region? Btw, language contacts can affect the patterns used!
15.30	Petter Kallioinen	First N400 study of DHH children: the group with CI rely on top down semantic processing while controls use bottom up	First N400 study of deaf and hard-of-hearing children: Found top down semantic processing in kids with CI, not in controls. Submitted

<b>Time</b>	<b>Person presenting</b>	<b>Title</b>	<b>Twitter-length abstract</b>
15.40	Ellen Marklund	Perceptual reorganization and speech exposure	Looking at the relation between speech exposure and perceptual categorization of speech sounds, measured by a mismatch response, in infancy.
15.50	Elisabet Cortes	Bitemarks in languages?	Bitemarks in languages? #jaw #sound_structure #motor_control #phdfestival2016
16.00	STRETCH	YOUR LEGS	FOR 10 MINUTES
16.10	Thomas Hörberg	The comprehension of transitive sentences in the self-paced reading paradigm	Morphosyntactic and prominence-based cues are utilized in a probabilistic and incremental fashion during the on-line comprehension of transitive sentences.
16.20	Calle Börstell	All your case are belong to us	TFW linguists be like “there are no case-marked pronouns in SLs” and you find a bunch. Here’s one in #ssl and some typology #phdfestival2016
16.30	Hatice Zora	Matching of auditory information onto lexical representations in the brain	Dynamic nature of lexical access and long-term memory traces for lexically specified prosodic information in the brain.
17.00	DRINKS	AND	FOOD FTW!
